

# Digestive Enzymes

Exceptional enzyme support

- Supports healthy digestive function
- Promotes nutrient absorption
- Aids with gastrointestinal discomfort that may occur after eating

## What is Digestive Enzymes?

Digestive Enzymes is a proprietary blend of 16 different enzymes that support digestive health by aiding in the breakdown of proteins, carbohydrates, and fats; and, in turn, the absorption of nutrients. Aging, illness, and stress may reduce the number of digestive enzymes produced by the body, causing incomplete digestion that can lead to unwanted side effects like bloating, abdominal discomfort, and flatulence. Supplementing with Digestive Enzymes can make up for these temporary deficiencies and help ensure your body's ability to get the most out of the food you eat and maintain healthy function.
